Being AIESEC the biggest international youth organization, we strive for **Youth Leadership Development**, since we believe that we need to empower youth to be the leaders of tomorrow, making them aware about the world's issues around them. For that, we provide **international leadership experiences** through volunteering and professional internships.

AIESEC is deeply connected with the **Agenda 2030**, since we established a partnership with UN and aligned all our projects according to the **Sustainable Development Goals**, engaging youth to contribute for them on a practical experience.

This event is aimed to raise awareness and discussion about the **Global Goals** and how youth can contribute to it, while hearing a testimony of Patrícia Martins, who actually went on a **Volunteering Experience**, working for the SDG number 4, quality education.
